

KALYAN KUMAR

Java Full Stack Developer | Spring Boot & Microservices | Angular
+1 704-264-9975 | thatikondakalyan03@gmail.com | linkedin.com/in/kalyan-kumar-thatikonda-17894a170

PROFESSIONAL SUMMARY

Java Full Stack Developer with 4+ years of hands-on experience delivering enterprise-scale, cloud-ready applications using Java, Spring Boot, and Angular. Proven expertise in designing RESTful microservices, building high-performance SPAs, and implementing secure, scalable backend systems. Strong background in Agile delivery, CI/CD automation, and cross-functional collaboration with product, QA, and DevOps teams in regulated and enterprise environments.

TECHNICAL SKILLS

Programming Languages:	TypeScript, JavaScript, HTML5, CSS3, SQL, XML, JSON
Frontend Technologies:	Angular 11–14+, TypeScript, JavaScript, HTML5, SCSS, RxJS, Bootstrap
UI Architecture & Patterns:	Single Page Applications (SPA), Component-Based Architecture, Lazy Loading, Route Guards, Reactive Forms, Custom Directives & Pipes
API & Integration:	RESTful APIs, Swagger/OpenAPI, HTTP Client Integration, JSON
Backend Technologies:	Java 8/11/17, Spring Boot, Spring MVC, Spring Security, JPA/Hibernate, REST APIs
Testing Frameworks:	Jasmine, Karma, Selenium (UI automation support), Postman (API validation)
Databases:	PostgreSQL, MySQL, Oracle, MongoDB, Cassandra
Cloud & Deployment:	AWS, GCP, Azure
DevOps & CI/CD:	Jenkins, GitHub Actions, GitLab CI, Angular CLI, NPM
Version Control:	Git, GitHub, SVN

PROFESSIONAL EXPERIENCE

Java Full Stack Developer	Sept 2025 – Present
Microsoft / Wipro, WA	
- Designed, developed, and enhanced end-to-end enterprise applications using Java, Spring Boot, and Angular, supporting complex business workflows and high-volume user traffic. - Architected and implemented RESTful microservices following domain-driven design principles, including layered architecture, centralized exception handling, and reusable service components. - Built secure backend services using Spring Security with JWT-based authentication and role-based authorization to meet enterprise security and compliance requirements. - Developed scalable Angular SPAs, creating reusable components, services, and shared modules to ensure consistency and reduce development effort across teams. - Integrated frontend applications with backend services using Angular HttpClient, implementing token management, error handling, and API response transformation. - Optimized database access and transaction management using JPA/Hibernate, improving application performance and data integrity. - Deployed and managed applications on Microsoft Azure, utilizing cloud services for application hosting, configuration management, logging, and monitoring.	

- Contributed to CI/CD pipelines, automating builds, testing, and deployments to ensure faster and more reliable release cycles.
- Wrote comprehensive unit and integration tests using JUnit, Mockito, Jasmine, and Karma to improve code coverage and reduce production defects.
- Actively participated in Agile/Scrum ceremonies, collaborating with product owners, architects, QA, and DevOps teams to deliver sprint commitments.
- Provided ongoing support during UAT and production releases, troubleshooting issues, performing root-cause analysis, and implementing long-term fixes.
- **Environment:** Java, Spring Boot, Spring MVC, Spring Security, RESTful Microservices, Angular, TypeScript, HTML5, CSS3, JPA, Hibernate, JWT, SQL, Azure, Git, CI/CD Pipelines, JUnit, Mockito, Jasmine, Karma, Agile/Scrum

Angular Developer

Aug 2024 – Aug 2025

Citi Groups, MO

- Developed and enhanced enterprise-grade single-page applications (SPAs) using Angular (v14+), TypeScript, HTML5, and SCSS, delivering responsive and high-performance user interfaces.
- Designed and implemented modular, reusable Angular components, directives, and pipes following Angular style guides and clean coding standards.
- Integrated Angular applications with secure RESTful APIs, handling authentication tokens, error handling, and response mapping.
- Implemented state management using RxJS and Observables, ensuring efficient data flow, reduced redundant API calls, and improved UI responsiveness.
- Applied lazy loading, route guards, and performance optimization techniques to enhance application load times and enforce role-based navigation.
- Built complex business forms using reactive and template-driven approaches, including custom validators and dynamic form controls.
- Collaborated closely with backend teams using Swagger/OpenAPI documentation to ensure seamless frontend-backend integration.
- Ensured cross-browser compatibility and responsive design using Bootstrap and custom SCSS, aligned with enterprise UI/UX standards.
- Developed and maintained unit tests using Jasmine and Karma, improving frontend stability and regression coverage.
- Actively participated in Agile/Scrum ceremonies, contributing to sprint planning, estimation, backlog grooming, and retrospectives.
- Supported UAT cycles and production issue resolution, working with QA and support teams to deliver stable releases.
- **Environment:** Angular 14+, TypeScript, HTML5, SCSS, RxJS, RESTful APIs, Swagger/OpenAPI, Bootstrap, Jasmine, Karma, Git, Jenkins, Agile/Scrum, Jira

Full Stack Developer

Feb 2024 – Jul 2024

Campus Recruitment Management System (Academic Project)

- Developed a full-stack web application to automate campus recruitment processes for students, recruiters, and administrators.
- Built responsive user interfaces for job listings, student profiles, and application tracking using modern front-end technologies.

- Implemented RESTful APIs for job posting, eligibility validation, and application management with secure role-based access.
- Designed and integrated a relational database to manage users, job postings, applications, and interview data.
- Implemented authentication and authorization to ensure secure access for Admin, Recruiter, and Student roles.

Software Engineer I

Jul 2022 – Jul 2023

Quiddity Infotech, IND

- Developed and maintained scalable frontend applications using Angular 11+, TypeScript, HTML5, and SCSS, focusing on reusable and maintainable UI components.
- Integrated frontend modules with secured REST APIs, implementing error handling, request orchestration, and response transformation.
- Implemented NgRx-based state management, ensuring predictable state flow and improved performance for data-intensive screens.
- Applied lazy loading and route guards to enhance application security and reduce initial load times.
- Designed responsive UI layouts using Bootstrap and custom CSS, ensuring cross-browser compatibility and accessibility.
- Wrote unit and component-level tests using Jasmine and Karma to support regression testing and improve code quality.
- Integrated frontend builds and automated tests into CI/CD pipelines using Jenkins and GitLab CI.
- Collaborated with QA teams during SIT and UAT, addressing UI defects, performance issues, and usability feedback.
- Participated in Agile ceremonies, including sprint planning, story estimation, and retrospectives.
- **Environment:** Angular 11+, TypeScript, JavaScript, HTML5, SCSS, RxJS, NgRx, Bootstrap, CSS3, RESTful APIs, JSON, Jasmine, Karma, Jenkins, GitLab CI, Git, JIRA, Agile/Scrum

EDUCATION

Master of Science in Applied Computer Science

Northwest Missouri State University, Maryville, MO

Bachelor of Technology in Computer Science

Karunya Institute of Technology and Sciences
